

# Official Reseller Confirmation Document

---

**DATE:** 4 JUNE 2025

## 1. Introduction

This document serves to formally certify that **Makers Electronics** is the official and authorized reseller of **Cytron Technology Sdn. Bhd.** products in **Egypt**. Makers Electronics has been a valued partner since **15 June 2020** and continues to represent our products with professionalism, integrity, and dedication.

## 2. About Cytron Technology

**Cytron Technology Sdn. Bhd.**, based in Malaysia, specializes in digital making products such as motor drivers, Raspberry Pi-powered industry products, STEM educational kits and electronic components. We currently have nearly 100 distributors worldwide and an active online store: [www.cytron.io](http://www.cytron.io)

Our commitment to simplifying smart technology is reflected in our wide selection of education and industry products, aimed at providing user-friendly experiences to makers and engineers. These products are now available to the Egypt market through our trusted partner, **Makers Electronics**.

## 3. Official Reseller: Makers Electronics

Makers Electronics has been an official reseller of Cytron Technology products in Egypt for the past five years. They have consistently demonstrated strong capabilities in promoting our brand in their region through their webstore - <https://makerselectronics.com/>.

## 4. Authorization and Responsibilities

As the exclusive reseller, Makers Electronics is authorized to:

- Sell and distribute Cytron Technology products within Egypt.
- Provide after-sales service, technical support, and consultation.
- Represent Cytron Technology in local educational and industrial engagements.
- Promote Cytron Technology brand at relevant local events or exhibitions.

## 6. Conclusion and Endorsement

Cytron Technology Sdn. Bhd. fully endorses Makers Electronics as the authorized reseller for our products in Egypt. Their efforts to promote Cytron Technology products are highly appreciated and in alignment with our mission to simplifying smart technology for education and industry.
